

SULTAN CITY COUNCIL
AGENDA ITEM COVER SHEET

ITEM NO: C – 8

DATE: February 25, 2010

SUBJECT: Aid Agreement with Snohomish County
Resurface Eighth Street and Main Street

CONTACT PERSON: Connie Dunn, Public Works Director 

ISSUE:

The issue before the City Council is to discuss using the Interlocal agreement (ILA) between the City and Snohomish County (county) for resurfacing 8th Street and Main Street the summer of 2010 while the county is working in East County.

STAFF RECOMMENDATION:

Authorize staff to proceed with submitting an aid work order agreement with Snohomish County to resurface Eighth Street and Main Street with the city's \$30,000 in the 2010 budget.

SUMMARY:

Resurfacing an asphalt surface is a layer of emulsifier and ½ inch-sized gravel over the surface. Pavement engineer's state by doing the resurfacing, it adds 15 years of wearable surface to the road/street.

The county will be doing resurfacing of roads in the county and possibly for Washington State Department of Transportation (WSDOT) this summer. Speaking with Mel Ritz of the county, the city has a current ILA for road maintenance signed in 2002. The county's working with other cities to update the ILA because the county can offer a larger menu of service to choose from.

Resurfacing an asphalt surface extends the life by 15 years. Eighth Street was constructed in 1987 and is reaching the end of good surface life. Main Street was constructed in 1990-91 and would benefit from resurfacing.

BACKGROUND:

For several years, the city has worked with the county road maintenance division through an 'aid agreement work order' for center line and fog line stripping throughout

the city, dust coat (control) on gravel streets within the city, resurfacing Rice Road, and snow plowing. The City later this year will be asking the County to put down thermoplastic cross walk markings. This would allow volunteers to complete other projects in the city.

FISCAL IMPACT:

Cost is minimized if Sultan was able to link with Snohomish County to do work that Sultan does not have the equipment to accomplish when they are working in East County. The cost would be calculated by the county after the city fills out the Road Maintenance Aid Agreement Work Order (work order) (Attachment A). There is \$30,000 in the 2010 budget for street resurfacing.

RECOMMENDED ACTION:

Participate with the county on resurfacing 8th street and Main Street in Sultan using the Interlocal Agreement with Snohomish County, which has resurfacing projects scheduled for 2010. (Attachment B)

**RE: Snohomish County's 2010 Road Resurfacing Plan
Notice to Utilities and Other Jurisdictions**

Dear Interested Agency:

Enclosed is a draft list of Snohomish County's 2010 road resurfacing projects. The list is divided into geographic regions and includes the page and grid numbers from the Thomas Guide to assist with identifying project locations. We've also included a map to help you visualize project areas. In the event that the single page map does not provide the detail you need, please refer to either the enclosed detailed list or the quadrant maps posted on our website. The following link will take you to the more detailed website maps: [Snohomish County : Programs : Resurfacing](#)

Our goal is to coordinate with you in an effort to consider your agency's proposed improvements and/or any work that you must perform inside the County's right-of-way. In order to accomplish that goal, please have the appropriate person from your agency review the enclosed information and contact me right away if they see anything in our list that may conflict with your 2010 plans or any proposed work that may be constructed in the near future. If you anticipate conflicts or, for any reason, want to provide input regarding our 2010 Resurfacing Program, e.g., communicate a schedule related issue, please contact me by **January 29th, 2010**. We will be finalizing the overlay contract documents in February and must be able to incorporate revisions well before the contract is printed. We will give consideration to all input and potential conflicts as we become aware of them but cannot guarantee that requests can or will be accommodated. Certainly, the sooner we receive your input the better.

Requests to cut sections of new pavement (an overlay less than 3 years old) for construction or improvement projects will only be approved by the County Engineer on a case-by-case basis and will require a formal deviation request (along with an application fee of \$1,500). Your cooperation and early communication now, and in the future, will be greatly appreciated and will minimize costs and potential delays for us both.

Additional information regarding Snohomish County's Executive Recommended 2009-2014 Six-Year Transportation Improvement Program (TIP) is available for viewing at http://www.co.snohomish.wa.us/documents/Departments/Public_Works/TES/2010-2015AdoptedTIP.pdf

If you have any questions or concerns about the enclosed information, please call me as soon as possible at (425) 388-3488, ext. 4530. If you would like an electronic copy of the list you can email me at joyce.barnes@co.snohomish.wa.us and I'll send it to you upon receipt of your request.

Sincerely,

Joyce Barnes
Program / Pavement Management Engineer
Transportation and Environmental Services Division
